

**ON THE ROAD AGAIN**

*Route 66*

# Kingman

## MAXIMUM SITTING COMFORT IS

### Tilt Adjustment

The seat's angle can be varied between  $-6^{\circ}$  and  $+10^{\circ}$  for fatigue-free sitting.

### Adjustable Seat Cushion Depth

Comfort for any body size. You can vary the depth of the seat cushion by up to 60 mm to achieve the ideal sitting position.

### Fore/Aft Isolator

An integrated shock absorber softens horizontal vibrations in the direction of travel.

### Pneumatic Suspension

Vibrations and jolts are absorbed by a pneumatic suspension system with travel of 70 mm.

### Quick Down

A pneumatic quick down feature lets you rapidly lower the seat for getting in and out more easily.

### † Adjustment

For easy positioning in the vehicle, the entire seat can be moved toward the front or back over a range of 150–200 mm, depending on the vehicle type.

### **Integrated Headrest**

The integrated headrest ensures permanent safety

### **Integrated 3-Point Safety Belt System**

The 3-point safety belt system, featuring an adjustable guide and integrated in the backrest, is extremely comfortable to wear without pressing, rubbing or grating. Together with the headrest, the system delivers agreeable safety you love to take advantage of.

### **Active Seat Climate System**

The active seat climate system removes body moisture. This way the driver will never again sit at the wheel drenched in sweat. On cold days, the seat heating keeps you snug.

**NEW**

**Switch for Active  
(incl. heating)**

## **THE SUM OF MANY DETAILS**

### **Microadjustable Backrest**

You can finely adjust the angle of the backrest to optimize your sitting position.

### **Pneumatic Lumbar Support + Side Support Adjustment**

The pneumatic double-chamber lumbar support provides a good feeling and ideally supports the back. Together with the side support adjustment, it optimally prevents injury to the spinal disks.

### **Height Adjustment by 100 mm**

A new mechanism with middle and 8 lock-in positions providing feedback when setting the seat's position.

### **Adjustable Shock Absorber**

On the superhighway or on poorly conditioned roads, the adjustable shock absorber consistently delivers optimum suspension comfort.

The models shown in the brochure may not be equipped with the standard features. Subject to technical modifications.

**HIGH  
PERFORMANCE**

An innovative friction-optimized suspension system based on cutting-edge shock absorption and control technology. It features greater strength and stiffness for a longer service life and outstanding comfort.

The new height adjustment feature is especially easy to use.

The most important reason for feeling good in the driver's seat is a pleasant temperature. But even with air-conditioning in the vehicle, the driver sweats where his body contacts the seat. That is why the driver seat in Kingman is equipped with active seat climate system, which removes body moisture. This way the driver will not sit at the wheel drenched in sweat. On cold days, the seat heating keeps you snug.
