PRIMO® XXM

Standard Seat with Mechanical Suspension

PRIMO® XXM

Technical data

Standard seat

The Primo XXM has an easy-to-use lever for optimally setting the suspension to the driver's weight within the range between 45 and 170 kg. Especially when a vehicle is used by multiple drivers, it's important for unpracticed users to be able to quickly and intuitively perform this important setting. The extra-high backrest, in conjunction with a lumbar support, bolsters the back and ensures an even more comfortable ride. The Primo XXM is equipped with an operator presence switch as well as a duosensitive ELR-belt system as standard.

Mechanical suspension

Mechanical lumbar support

Manual weight adjustment
